

# Orca Torch 14.070

## Instructions

You just acquire a high quality product.

For optimal use of your torch please be aware of the following:

- If you are using a corrosive product, do an extensive cleaning of the gas injector valve after use;
- Use the appropriate tool to connect the torch to the gas terminal. Do not use pliers;
- Before lighting the torch, quickly open and shut the gas. This will remove any dirt from the hose;
- Avoid gas accidents. Be sure to keep the flame out of reach of the hose;
- Do not seal the connection with any object that can penetrate the torch or obstruct the gas flow.

Directions for use:

1. Choose the appropriate tip and connect it to the torch;
2. Open the gas regulator valve (found on tank);
3. Open the gas valve (found on torch);
4. Strike match and ignite torch;
5. Open the lateral air entrance (found on torch);
6. Adjust the lateral air entrance to obtain a blue flame;
7. Adjust gas and air valves to control and maintain a perfect flame.
