

Hi-Heat® BLOWPIPE

- ☐ 14.150 Hi-Heat Torch w/1 Tip
- ☐ 14.151 Hi-Heat Torch w/2 Tips
- ☒ 14.152 Hi-Heat Torch w/3 Tips

CAUTION

Do not use oxygen under any condition with tip Nos. 10,20, or 3D. These tips are for use **only with artificial, natural, or mixed artificial and natural gas and compressed air.**

When using oxygen with artificial, natural or mixed artificial, and natural gas, use **an oxygen tip only**, which may be purchased from your dealer.

A pressure regulator must be used, with either oxygen or compressed air.

WARNING: Never apply grease or oil to the blowpipe tips, connections or regulator.

Always shut the gas and air off at the master valve. Do not use the valves on the blowpipe for this purpose when the blowpipe is not in use.

Under no condition should this **blowpipe** be used with hydrogen, presto lite or acetylene, **permanent damage** to the **blowpipe** will result.
